

KODAK DIGIMASTER 9150 Digital Production System

Whether you're adding capacity or entering digital for the first time, you can feel confident that the KODAK DIGIMASTER 9150 Digital Production System will deliver the results you want. Our factory-certified reconditioned 9150 Digital Production System gives you the most award-winning hardware and software from Kodak for your budget. You get "like new" performance with the flexibility to grow, backed by the service and support of a company that knows the graphic communications business like no other — for less of an investment than you might think.

The Digimaster 9150 System, with a maximum speed of 150 pages per minute, gives you:

- Versatile, dependable solutions for high-volume, monochrome digital printing
- Maximized productivity for tight deadlines and cost-effectiveness
- Flexibility and scalability for diverse and changing needs
- Equipment that supports a wide range of paper sizes, types and finishes
- Short, straight paper path for reliable paper throughput that maximizes uptime to achieve higher productivity and quicker job-turnaround time
- Printing speed of 150 A4/letter pages per minute
- Large paper capacity, up to 12,000 sheets (9 paper supply drawers)
- Fully modular design with options for additional paper supply modules, stackers, inserter, hole puncher, booklet maker, and perfect binder

Base configuration Print engine with three paper drawers

- Operator control interface with 17" flat panel monitor display
- System control subsystem
- Finisher
- SP or AP Print Production Software

Printing speed

- 150 A4/letter pages per minute

Imaging technology

- Dry electrophotography
- 600 dpi, single bit

Substrate format

- Top drawers:
 - In-track (standard): 203-229mm (8-9")
 - In-track (extended paper size option*): 178-229mm (7-9")
 - Cross-track (standard): 250-356 mm (9.84-14")
 - Cross-track (extended paper size option*): 210-364mm (8.27-14.33")
- Middle and lower drawers:
 - In-track (standard): 203-457mm (8-18")
 - In-track (extended paper size option*): 178-470mm (7-18.5")
 - Cross-track (standard): 250-356 mm (9.84-14")
 - Cross-track (extended paper size option*): 210-364mm (8.27-14.33")
 - Paper weight
- Standard: 60 g/m² to 200 g/m² (16 lb. bond to 110 lb. index)
- With enhanced feed mode option: 60 g/m² to 266 g/m² (16 lb. bond to 150 lb. index)
-

Modular Options & Accessories

Trimmer

As part of the book publishing solution, an in-line trimmer is available through third-party solution provider, Challenge Manufacturing.

Stacker

Add one, two or three stackers to the DIGIMASTER EX system for maximum productivity. Each stacker has a capacity of 5,000 sheets and offers straight or offset stacking and delivers collated sets ready for the next step in the finishing process.

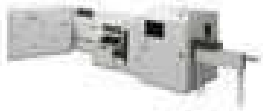

Square Back Booklet Maker

The WATKISS Spinemaster allows you to produce booklets with square backs and print the document's title or other information on the spine, giving a high-quality, professional appearance. This optional component is available through third-party solution provider Watkiss.

Roll Feed Module

Optional roll feed solution expands continuous run capability for high volume applications providing a yield up to 60,000 sheets of 8.5 X 11 or A4 paper. Switch from 8.5 X 11 to 11 X 17 (A4 or A3) between jobs without changing rolls.

Perfect Binder

The perfect binder offers the versatility to produce smartly finished, perfect bound books in a range of pages. It delivers up to 250 bound books per hour with a wide variety of covers types simply, easily and automatically. In-line or off-line binding is available.

Paper Supply Module

DIGIMASTER EX print engines have optional paper supply modules, each with three drawers and a capacity of 4,000 sheets. The DIGIMASTER EX system has the capability to expand capacity to nine paper supply drawers for 12,000 sheets of paper.

Hole Puncher

The in-line hole puncher multiplies the flexibility and productivity of the DIGIMASTER EX system with the fully integrated hole punching solution. The hole puncher can punch sheets for ring, plastic comb, spiral and twin loop bound documents. The hole puncher eliminates the cost of pre-drilled paper and reduces costs of off-line hole punching.

Extended Paper Supply Module

The extended paper supply module accommodates larger paper sizes in all three drawers for maximized application flexibility with a capacity of 4,000 sheets. Dimensions: Height 45" (1.14 m), Length 36" (.91 m), Depth 33.5" (.85 m), Weight 545 lbs. (247 kg).
