System Information

Océ TDS700 fits the way you want it

Productive, flexible wide format system

Océ TDS700 fits the way you want it

Productive, flexible wide format system

In today's technical environments a wide format system has to please everyone. Business people want value for money and peace of mind. That means a flexible, reliable system that saves time and money. Users want simplicity and reliability. In other words, an easy-to-use machine that fits current workflows.

The Océ TDS700 meets all these requirements. With a robust, configurable printer, the powerful Océ Power Logic[®] controller, a choice of two scanners, and a wide range of software, it fits the way you work both now and in the future.

Océ TDS700 fits the way you want it

The logical choice for your organization

Océ TDS700 is the perfect fit no matter what your wide format requirements are:

- True print productivity independent of media size changes within the print job (4.7 E/min.; 9.1 D/min.)
- Concurrent printing and scanning
- Instant-on. No waiting around for the system to warm up
- 600 × 1200 dpi pico printing for sharper details and smooth grayscales
- A choice of two scanners (monochrome and color), a folder, and different media size configurations
- Unmatched ease of use, iF communication design award 2006
- Océ Print Exec® Basic software offers web-based job submission
- Lowest energy consumption in its class
- Océ robust design, reliable by nature

Ideal for both corporate and commercial environments

The Océ TDS700 fits the way you want it whether wide format documents support your business or generate your income.

In CAD/Engineering environments:

- Up to six rolls and sheet feeders to give you all the media flexibility you need
- System can be installed close to users for quick and easy access because of the low noise, reduced ozone discharge and negligible heat emission

- Fastest time from cold start to print in the industry
- Silent printing means productive employees

In Reprographic environments:

- High quality output through 600 × 1200 dpi pico printing
- Print over 10,000 sq. ft. without having to reload media
- Right the first time with Océ Image Logic® technology pushing your productivity to the edge
- System's ease of use makes it productive from the moment it's installed

A wide selection of software tools

Thanks to a full range of software, the Océ TDS700 has the flexibility to be configured into any environment and the power to optimize your workflow.

Océ Account Center software

With Océ Account Center software your operations take a significant step towards turning document services from costs to profits. By facilitating cost allocation and reimbursement for printing, copying, and scanning, Océ Account Center will help ensure all work is charged to the appropriate user, department, or project. Not only are all costs recovered, but you significantly increase your return on investment.

Océ Repro Desk® software

Océ Repro Desk software is a print creation and distribution software platform that provides benefits in a workgroup or central repro environment. This platform consists of a suite of applications that are seamlessly integrated; connecting an AutoCAD® designer's desktop to a reprographer's digital print room, creating a true end-to-end digital workflow.

Using Océ Repro Desk software will help you:

Boost productivity and output

- Streamline print submission by enabling the use of DWG and DWF files vs. requiring the use of plot files

Win new business and increase profitability in a central repro environment

- By making it easier to submit jobs digitally and expand your geographic boundaries using Océ Client Tools™ software
- Seamlessly integrate environments to the central printing environment without the need for additional time-consuming steps
- Minimize troubleshooting since output is received exactly as expected

The diagram above illustrates an easy-to-use system for current and future workflows

- Print with Océ driver or Océ Print Exec suite software
- Single copies or productive set copying with Océ Matrix Logic® technology
- Scan to archive with Océ Scan Logic® software

Engineering Department prints with

- 1 Windows® printer driver
- 2 Adobe® PostScript® 3™ printer driver
- 3 Web-enabled job submission

IT Department

- 4 Distributes new drivers via server
- 5 Remotely controls the printer settings

Archive Department

- 6 Copies large format drawings
- 7 Digitizes microfilm/analog drawings
- 8 Archives digital drawings

Print Facility

- 9 To serve all print, copy, and scan needs concurrently
- 10 Easy to use system

Purchase manager

“I want a printer that’s the best deal”

Owner site manager

“I want a printer that keeps everyone happy”

IT manager

“I want a printer that fits our IT set-up”

Facility manager

“I want a printer I can install and forget about”

Network administrator

“I want a printer that’s predictable”

The Océ TDS700 gives network administrators full control over the system’s operation from their workplace:

- Océ TDS700 Power Logic® controller remote provides full access to all system settings
- All administrator settings are password protected
- Advanced security settings prevent unwanted access
- A full range of software is available, from an entry level package to a fully loaded configuration

CAD manager

“I want a printer that’s ready when I need it”

The Océ TDS700 makes life easy for CAD managers because it outputs documents fast and on time:

- When a job is ready for printing, the system reacts instantly—no waiting for system warm up
- Océ Advanced Queue Management gives users prints when they need them
- Easy-to-use templates mean copies and scans are right the first time—no time consuming troubleshooting
- Users can submit prints using certified printer drivers or with the web-enabled Océ Print Exec Basic software—ensuring quality, reliable output every time

CRD manager

“I want a printer that’s easy to use”

With the Océ TDS700, central repro managers can offer a high level of service to internal customers:

- Schedule and reorganize jobs with Océ Advanced Queue Management—to receive priority print or copy jobs quickly
- Océ Image Logic technology ensures right-first-time copying and scanning
- Different access levels are password protected—preventing errors
- Smart user interface guides people through the system
- User-specific settings can be saved for easy access later—streamlining printing and copying
- System can be expanded with up to six rolls, a sheet feeder and an inline folder providing a solution for you now and into the future
- Scanner is ready for future services like color scan to archive

Printing for Professionals

Océ is a leading supplier of digital document management and delivery technology. The company's solutions are based on Océ's advanced software applications that deliver documents and data over internal networks and the Internet to printing devices and archives—locally and around the world. Supporting the workflow solutions are Océ digital printers and scanners, considered the most reliable and productive in the world. Océ also offers a wide range of consulting and outsourcing solutions.
