Perfect Color: speed, power, security and scalability.
bizhub color: the perfect choice for productivity.

TO COMMUNICATE AND COMPETE MORE EFFECTIVELY, PROFESSIONALS COUNT ON COLOR – AND WITH NEW DUAL SCAN CAPABILITIES AND FINISHING OPTIONS, THE BIZHUB C652 SERIES LETS YOU CHOOSE THE COLOR THAT FITS YOUR WORKFLOW. YOU’LL BE ABLE TO KEEP AHEAD OF RISING DOCUMENT TRAFFIC, SCAN INFORMATION FASTER, PRINT AND COPY IN HIGH-IMPACT COLOR OR COST-EFFECTIVE B&W, PRODUCE FINISHED COLOR BOOKLETS, REPORTS, PRESENTATIONS AND MAILINGS IN-HOUSE – ALL TO MAKE INFORMATION MORE ACCESSIBLE, MEMORABLE AND PERSUASIVE.

Five models – each designed to get the job done better.

The bizhub C652 Series gives you revolutionary scalability – in output, scanning speeds, finishing capabilities, security options, even software.

The bizhub C652DS and C652 deliver high-speed color prints and copies at 50 ppm, with even faster 65 ppm B&W output. The bizhub C552DS and C552 provide color output of 45 ppm and B&W output of 55 ppm. And the bizhub C452 gives you 45 ppm output in both color and B&W.

To bring information into your system even more quickly, the bizhub C652DS and C552DS incorporate Dual Scan technology that scans both sides of a page in a single pass – a revolutionary Konica Minolta advancement that lets you scan documents at up to 156 originals per minute.

Every bizhub C652 Series device incorporates green technologies to lower power consumption and save energy – which helped the bizhub C552 win BLI’s Outstanding Achievement award for energy efficiency in 2009. And whisper-quiet operation in both print/copy and standby modes can make any business or educational environment calmer and more productive.

In all our manufacturing operations, we also reduce emissions, eliminate many hazardous substances and use recyclable materials wherever we can to reduce the environmental impact of each product throughout its entire life cycle.
At the heart of every bizhub C652 Series device is bizhub OP (Open Platform) technology — driving the unique Konica Minolta approach to MFP productivity with the power to move information more freely, quickly and simply than ever before.

Exclusive bizhub Architecture consolidates major functions on uniform modules for fast internal processing with a consistent control interface that requires less operator training. The Emperon® Print System is built in, with PCL6/PS3 emulation and native XPS functionality to handle print files in any format. And Universal Printer Drivers simplify print management with a common user interface, standard commands, and auto detection and configuration of devices to simplify IT control in multi-printer networks.

With bizhub Extended Solution Technology (bEST), your bizhub can interface seamlessly with print management, variable printing, cost control and other specialized software — advantages that large and mid-size businesses demand to meet specialized needs like print management, variable printing, account tracking and cost control.

Simple operation, seamless networking.
A large 8.5” color touch-panel display makes even walk-up printing and copying more productive. Intuitive operation, simple menus and programmable shortcut keys put more power at your fingertips. Thumbnails let you preview documents before you print, avoiding mistakes that waste time and paper. Animated screens guide you and make menus more user-friendly. And blue LED function key lights are easier to see.

All five bizhub C652 Series models incorporate Konica Minolta’s industry award-winning MyTab™ print convenience, allowing individuals to create a customized tab that saves their preferred print settings for quick access.

The built-in power of bizhub OP.

At the heart of every bizhub C652 Series device is bizhub OP (Open Platform) technology — driving the unique Konica Minolta approach to MFP productivity with the power to move information more freely, quickly and simply than ever before.

Exclusive bizhub Architecture consolidates major functions on uniform modules for fast internal processing with a consistent control interface that requires less operator training. The Emperon® Print System is built in, with PCL6/PS3 emulation and native XPS functionality to handle print files in any format. And Universal Printer Drivers simplify print management with a common user interface, standard commands, and auto detection and configuration of devices to simplify IT control in multi-printer networks.

With bizhub Extended Solution Technology (bEST), your bizhub can interface seamlessly with print management, variable printing, cost control and other specialized software — advantages that large and mid-size businesses demand to meet specialized needs like print management, variable printing, account tracking and cost control.
WITH THE BIZHUB C652 SERIES, YOU CAN COUNT ON A PERFECT MATCH FOR ALL YOUR COLOR AND B&W PRINTING REQUIREMENTS – CORPORATE REPORTS, SALES TRAINING MANUALS, DIRECT MAIL BROCHURES, HUMAN RESOURCES DOCUMENTS AND MORE. FAST SPEEDS, SUPERIOR RELIABILITY AND POWERFUL, FLEXIBLE OPTIONS LET YOU CREATE A RIGHT-SIZE SOLUTION FOR SHORT-RUN COLOR PRINTING AND FINISHING – SATISFYING CORPORATE AND PRINT-FOR-PAY CLIENTS WHILE IMPROVING IMAGE QUALITY AND REDUCING COST.

The speeds, feeds and features you need.

With print/copy color output of 50 ppm or 45 ppm, and B&W output speeds ranging from 65 ppm to 45 ppm, you can choose the bizhub that matches the needs of your application. Whichever model you choose, compact design saves valuable office space – and even with optional finishers attached, you’ll have powerful in-house color capabilities in a surprisingly small footprint.

In high-volume environments with rising document workloads, the Dual Scan technology of the bizhub C652DS and C552DS can double your scanning capability to 156 originals per minute – speeding your throughput and increasing your productivity. All five models allow you to add a Scan Accelerator option (SA-502) for optimum performance with 3rd-party document management solutions.

Accelerated RIP speed produces color prints faster. With standard reversing auto document feeders, the bizhub C652, C552 and C452 scan documents at up to 78 originals per minute to bring information into your workflow more quickly. They also warm up in seconds, so you can start making prints and copies before your coffee gets cold.

bizhub printing: greater flexibility at lower cost.
Print features for flexible input and output.
You can scan originals in sizes up to 11” x 17”, handling two-page spreads in a single scan. Auto duplexing of up to 140 lb. index stock at rated engine speed lets you save paper while maintaining 100% productivity. Proof Copy allows you to check your output before making a full print/copy run, avoiding reprints that waste time and paper.

You’ll have two choices in optional large capacity paper cassettes. The LU-301 accepts 3,000 sheets of letter-size paper and raises maximum paper capacity to 6,650 sheets, enough to work far longer without re-loading paper. The adjustable LU-204 loads up to 2,500 sheets of paper in 8-1/2” x 11”, 8-1/2” x 14”, 11” x 17”, even 12” x 18” size – so you can print oversized graphics, 2-page spreads and color proofs that preserve crop marks and borders.

In copy mode, you can automatically apply a transparent watermark to copies – and easily copy two-sided business cards, drivers’ licenses and insurance cards with the new Card Shot feature. When you copy documents with the cover open, Non-Image Erase automatically eliminates the black area surrounding your original.

For even greater flexibility, you can print wirelessly with the Bluetooth® option (EK-605) – and use a standard USB connector for saving files to and printing from a USB thumb-drive as well as importing and exporting files to/from User Boxes.

Finishing power for in-house productivity.
With a powerful array of finishing options, each bizhub C652 Series model can be customized to fit the document needs of any business, institutional or educational environment.

The bizhub C652DS, C652, C552DS and C552 accept a modular Staple Finisher (FS-526) with 100-sheet multi-position stapling and custom sorting and grouping. Using the FS-526, you can expand your finishing capabilities with a Saddle Stitcher Kit (SD-508) for creating booklets up to 80 pages in length, a Punch Kit (PK-516) for 2/3-hole punching at top or side, a Z-Fold Unit (ZU-606) for Z-Folding, and a Post-Inserter (PI-505) to add pre-printed covers or chapter dividers.

There’s even a Job Separator Tray (JS-602) option that adds a third tray to sort print, copy and fax output.

All five models in the bizhub C652 Series accept a compact Floor Finisher option (FS-527), with 50-sheet stapling. Using the FS-527, you can add a Hole-Punch Kit (PK-517) for 2/3-hole punching at side or top and a Saddle Stitcher Kit (SD-509) for booklets up to 60 pages (15 sheets). An optional Job Separator Tray (JS-603) acts as a third output tray to separate prints, copies and faxes. And with optional FS-527 Floor Finisher or optional OT-503 Output Tray installed, you can produce full-color banners up to 11-3/4” x 47-1/4”.

Reliability for workhorse performance.
To keep working, with maximum uptime – that’s the goal of any business or institution. The bizhub C652 Series meets and exceeds this goal with internal components redesigned for longer life and trouble-free performance day after day, month after month.

Every bizhub model also provides economy and reliability that reduce your total cost of ownership. Separate black drum and developer unit yield lower cost per copy. You can replace these components individually to save even more.

And industry-leading transferred image quality produces full-color print/copy documents that look more like your original or on-screen image – so first results match your needs and demands without tedious reprinting.

* Please check the bizhub media guide for recommended banner paper.
bizhub control: scanning, security and software.

WITH HIGH-SPEED SCANNING, YOU CAN COUNT ON EVERY BIZHUB C652 SERIES MFP TO STREAMLINE YOUR WORKFLOW. MOVE DOCUMENTS AND DATA IN ANY FORM. DISTRIBUTE TO MULTIPLE DESTINATIONS WITH FEWER KEYSTROKES. AND STORE AND SHARE INFORMATION MORE EASILY FROM A STANDARD 250 GB HARD DISK DRIVE. YOU CAN ALSO CUSTOMIZE YOUR SYSTEM WITH ADVANCED COLOR CONTROL, HIGH-SPEED FAX, UNIQUE i-OPTIONS, ENHANCED SECURITY PROTECTION AND SEAMLESS NETWORKING SOFTWARE – ALL THE POWER YOUR BUSINESS NEEDS.

Scan documents to multiple destinations.

In addition to the dramatic Dual Scan capabilities of the bizhub C652DS and C552DS, every model in the bizhub C652 Series provides fast, flexible scanning to multiple destinations: Scan to Email, FTP, SMB, and TWAIN scanning from PCs. Convenient Scan-to-Me and Scan-to-Home functions let you quickly bring information into your personal workflow. And bizhub Send function lets you perform scan functions simultaneously – for example, scanning and Emailing a file to a co-worker while faxing it to an outside supplier and saving it to your FTP site.

On a built-in 250 GB Hard Disk Drive, User Boxes provide dedicated storage for individuals, departments, workgroups, even projects. User Box Routing commands let you move, delete and combine document pages and change resolution and color output settings.

WebDAV (Web-based Distributed Authoring and Versioning) support helps you manage server files/folders, identify authors and dates, lock documents and track revisions. The C652 Series supports Windows Distributed Scan Management (DSM)*, an exciting new scan management and workflow technology developed by Microsoft for Windows 7 and Windows Server 2008 R2. IPv6 support gives every networked bizhub device its own IP address. And Gigabit Ethernet handles information more quickly to reduce traffic demands on your network.

Manage color with professional ease.

For graphics-intensive applications, each bizhub C652 Series model accepts an optional IC-412 Fiery® Image Controller with standard EFI Command Workstation functionality, advanced color matching, color calibration and print queue management, Fiery Remote Scan, and EFI WebTools. You’ll be able to handle specific Pantone color requirements, manage print queues more effectively, and fine-tune color output for more professional results. Fiery VUE software gives creators an intuitive, icon-driven view of their documents – to orchestrate all elements into a professional high-impact result.

Powerful Fiery Graphic Arts Options include Auto Trapping, Hot Folder printing with embedded job ticket settings, job setup with finishing options and imposition attributes for drag-and-drop printing, Color Profiler Suite, Secure Erase, and Fiery Impose function for editing, assembling and previewing documents at pre-RIP level to save time.

*May not be available at time of launch.
IT power with PageScope software.

PageScope Enterprise Suite can give every bizhub C652 Series device a server-based authentication and accounting solution to track activities on a per-page basis, customize your display based on user log-in at any MFP on your network, and provide password-protected log-in with multiple authentication possibilities: Biometric, HID Proximity Cards, HID iClass Cards**, CAC/PIV Cards**, network user name and password. Authentication cards and the Biometric Authentication Unit can be used independently or with PageScope Enterprise Suite.

You can add more options: a Copy Guard/Password Protect Kit (SC-507), the HID Proximity Card Authentication Unit (AU-201H), HID iClass Card Authentication Unit (AU-202H**), CAC/PIV (Common Access Card/Personal Identification Verification Card) Solution (AU-211P**), or Biometric Authentication Unit (AU-102) for secure access to bizhub MFP functions with quick “ID and Print” operation.

Total security for the networked era.

Konica Minolta leads the industry in protecting sensitive information — conducting a far more extensive security evaluation than our competitors do. The bizhub C652DS and C552DS are in evaluation to meet the strict new requirements of ISO 15408 Common Criteria security classification — and the bizhub C652, C552 and C452 have already been certified.

Standard security protections include bizhub Secure Print password locks, customized User Authentication, Encrypted PDF workflow, IP Filtering to register IP addresses of PCs on your network, SSL/TLS Encryption to protect data during exchange with authentication servers, S/MIME Encryption to safeguard Email exchanges and disk drive security features like HDD Lock, HDD Job Erase, HDD Encryption, and HDD sanitizing to meet military and international standards.

You can add more options: a Copy Guard/Password Protect Kit (SC-507), the HID Proximity Card Authentication Unit (AU-201H), HID iClass Card Authentication Unit (AU-202H**), CAC/PIV Cards**, network user name and password. Authentication cards and the Biometric Authentication Unit can be used independently or with PageScope Enterprise Suite.

PageScope Enterprise Suite can give every bizhub C652 Series device a server-based authentication and accounting solution to track activities on a per-page basis, customize your display based on user log-in at any MFP on your network, and provide password-protected log-in with multiple authentication possibilities: Biometric, HID Proximity Cards, HID iClass Cards**, CAC/PIV Cards**, network user name and password. Authentication cards and the Biometric Authentication Unit can be used independently or with PageScope Enterprise Suite.

PageScope Web Connection and PageScope Net Care Device Manager enable individual users and IT administrators to manage multiple devices more easily. PageScope Print Status Notifier provides automatic alerts to speed your workflow. PageScope Data Administrator™ handles addresses, passwords, and accounts — and PageScope Workware™ makes it easy to manage scanned documents, view thumbnail images, search files, link files and convert file formats. With the bizhub C652 Series, the possibilities keep growing — and your business will look better than ever.

More options for all-in-one productivity.

To manage all your document traffic from one convenient location, the bizhub C652 Series also features standard Color Internet faxing and lets you add an optional Super G3 Fax Kit with sophisticated transmission and reception features, PC and IP Address Faxing, even optional dual line to double your fax handling capacity.

Your workflow will benefit from the optional features available with three unique Konica Minolta i-Option™ Kits. The LK-101 v.2 i-Option Kit combines an AJAX-capable web browser, the convenience of Scan-to-SharePoint® function, and a unique Image Panel interface that makes it easier to handle information stored in User Boxes. The LK-102 i-Option Kit provides AES 128-bit PDF encryption to meet government standards. And the LK-105 i-Option Kit lets you create searchable PDF files to locate specific text references.

An optional Color Profiler suite allows you to create customized ICC profiles with CMYK devices. The EFI Spectrophotometer (ES-1000) option gives you a fast, hand-held color profiling tool that measures individual color patches, full patch strips or day-to-day variations in printer inks and toners — and the EFI Spectrophotometer can automatically compensate for color fluctuations.

**Anticipated availability Spring 2010.

Konica Minolta Business Solutions U.S.A., Inc., is a fast-growing leader in advanced digital imaging systems. From desktop to print shop, Konica Minolta supplies leadership products that business professionals count on to fulfill increasing demands for high-speed, low-cost color and B&W document output. With over 37,000 worldwide employees, cutting-edge research programs in optical and digital technology, and the industry’s most complete line of document imaging solutions, Konica Minolta was recognized by Brand Keys for the second consecutive year as the #1 Brand for Customer Loyalty in the MFP Office Copier Market. As long as you count on Konica Minolta, you’ve made the right decision.

General Specifications:

- **PROTOCOLS:**
  - PRINT/PRINTER NETWORK:
  - PORT (Ethernet, Fast Ethernet, Gigabit Ethernet)
  - **APPLICATIONS:**
    - Windows Server 2008 (x32, x64)
    - Windows 2003
    - Windows XP (x32, x64)
    - Windows 7
    - Mac (OS 9, 2020)
    - Linux

- **PRINT DRIVERS:**
  - Intel Celeron 1.8 GHz, 512 MB RAM, 10 GB HDD
  - Intel® 3.0 GHz, 1 GB RAM, 20 GB HDD
  - AMD Athlon 1.8 GHz, 256 MB RAM, 10 GB HDD

- **PROCESSOR/MEMORY/HARD DISK DRIVE:**
  - Intel Celeron 1.8 GHz, 512 MB RAM, 10 GB HDD
  - Intel® 3.0 GHz, 1 GB RAM, 20 GB HDD
  - AMD Athlon 1.8 GHz, 256 MB RAM, 10 GB HDD
